TUWAIQ ACADEMY · FLOWCHART PROJECT

ATM Withdrawal Flowchart

This chart shows every step when a customer takes cash from an ATM. It goes from putting in the card to taking the card back.

69 steps | **10** Terminators | **25** Input / Output | **20** Process | **14** Decisions

Six parts

1. Start and Insert the Card
2. Enter the PIN
3. Choose the Amount
4. Check the ATM
5. Give the Cash
6. Finish the Transaction

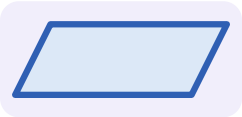

The five symbols

Each flowchart symbol has a specific meaning and purpose.

Terminator
Shows where the chart starts or ends.

EXAMPLE
Start, End

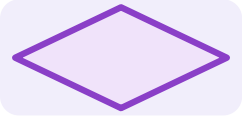

Input / Output
Shows when information goes into or out of the system.

EXAMPLE
Customer enters the PIN. Show: Card blocked.

Process
Shows an action or a calculation.

EXAMPLE
Add 1 to PIN tries

Decision
Asks a question that has a Yes path and a No path.

EXAMPLE
Is the PIN correct?

Arrow
Shows the direction and the order of the flow.

EXAMPLE
Follow the arrows from Start to End

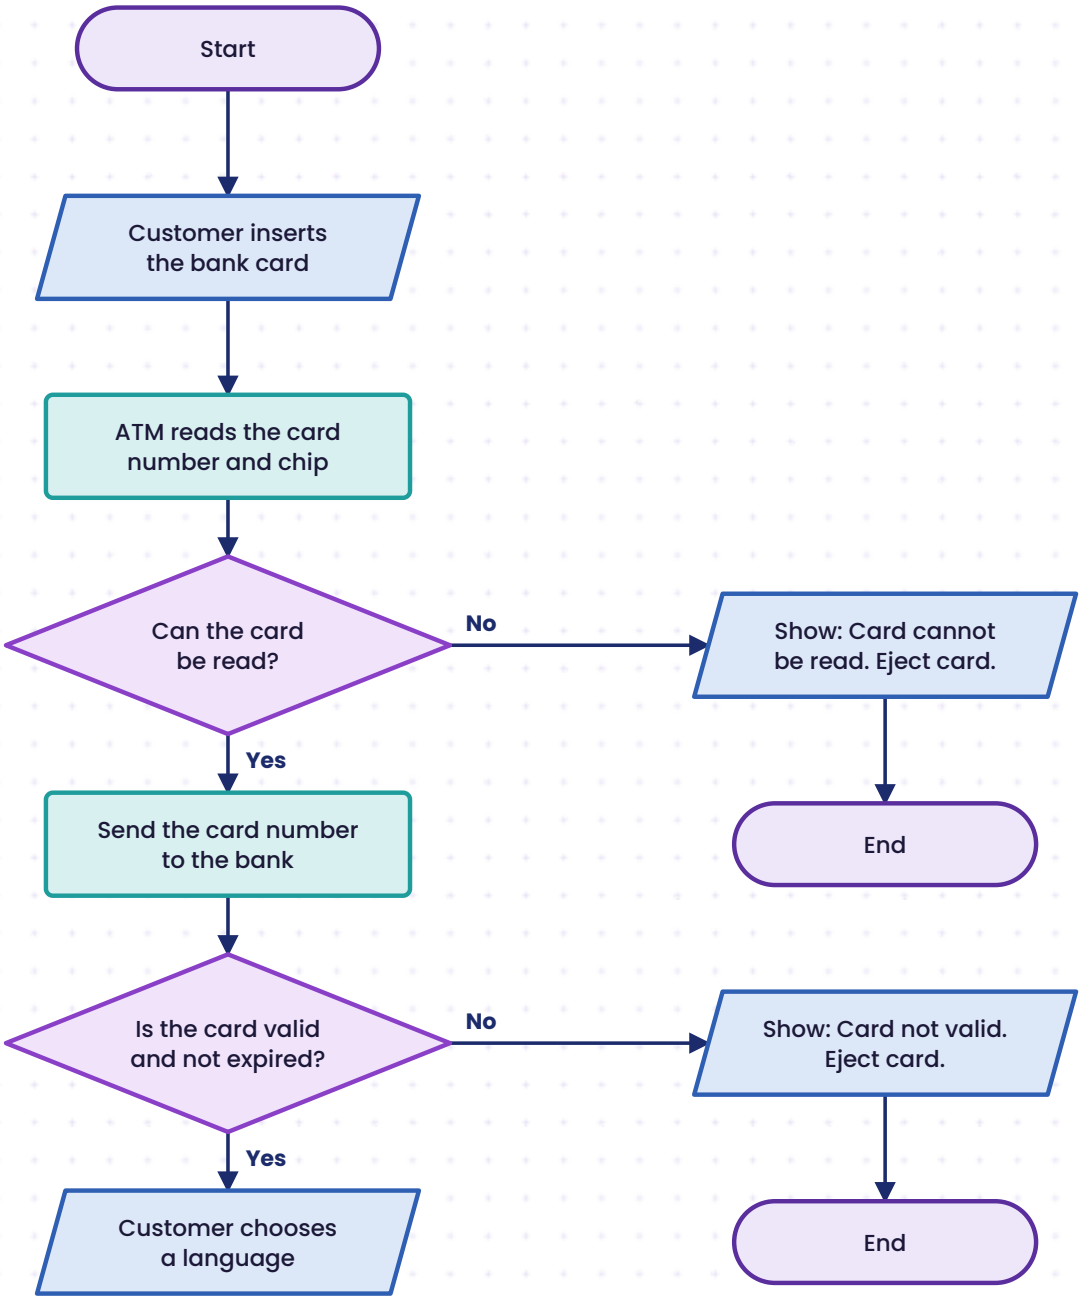

How to read the chart

1. Start at the Start symbol at the top.
2. Follow the arrows down, one step at a time.
3. At a diamond, answer the question and follow the Yes arrow or the No arrow.
4. Stop when you reach an End symbol.

PART 1 OF 6 · 11 STEPS

1 Start and Insert the Card

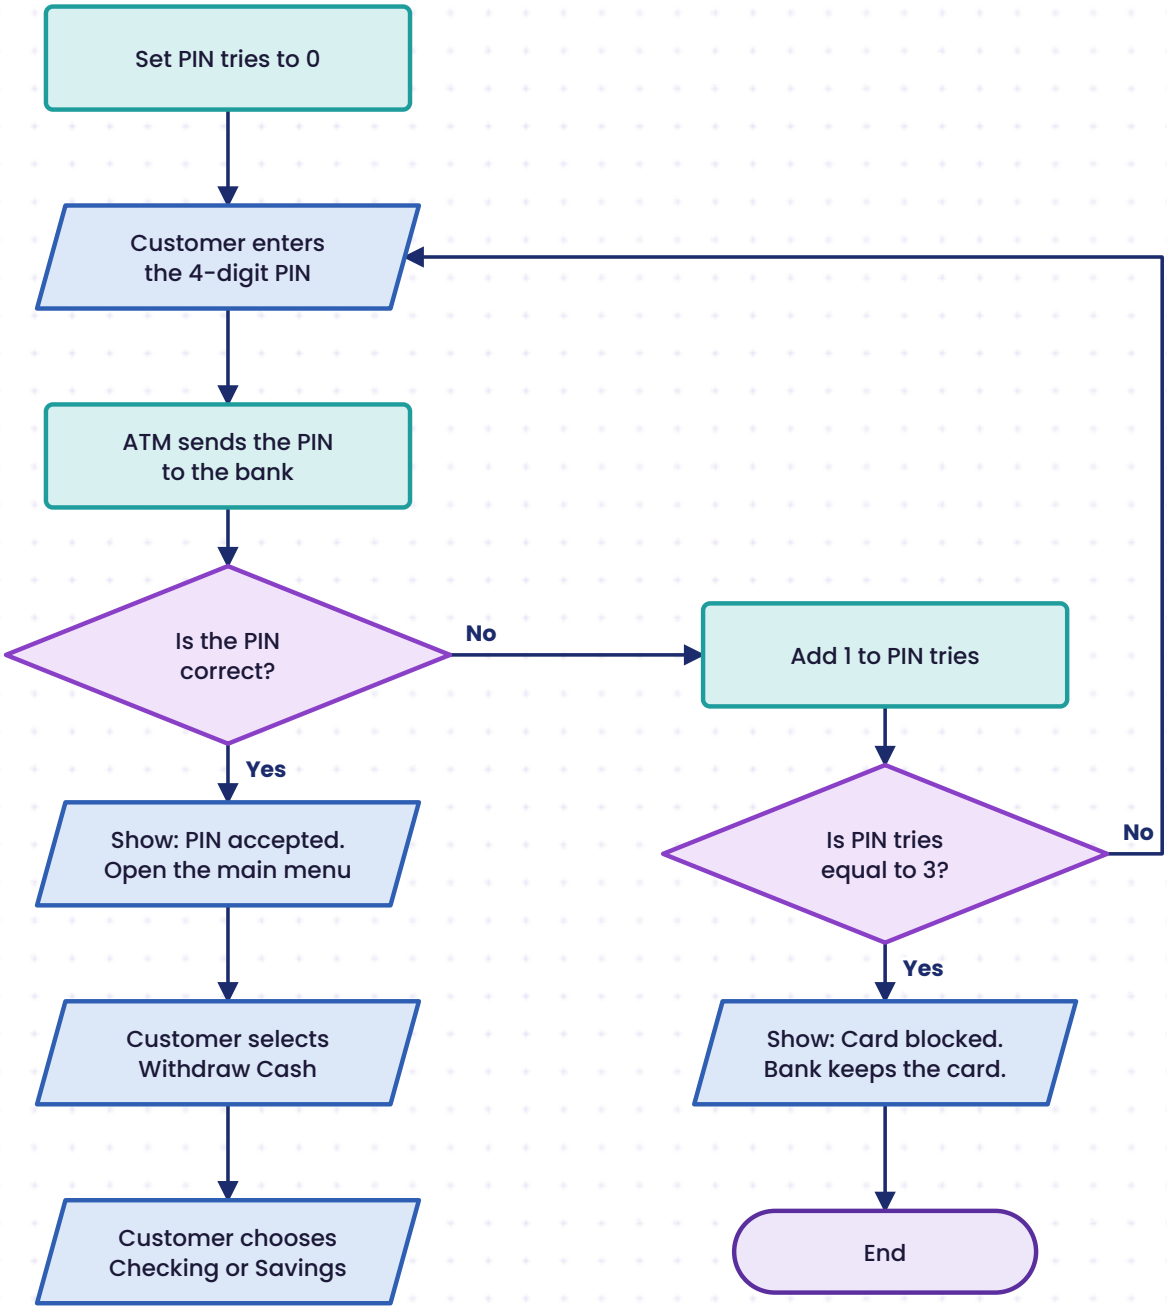

The customer puts the card in. The ATM checks that the card can be read and that it is valid.

PART 2 OF 6 · 11 STEPS

2 Enter the PIN

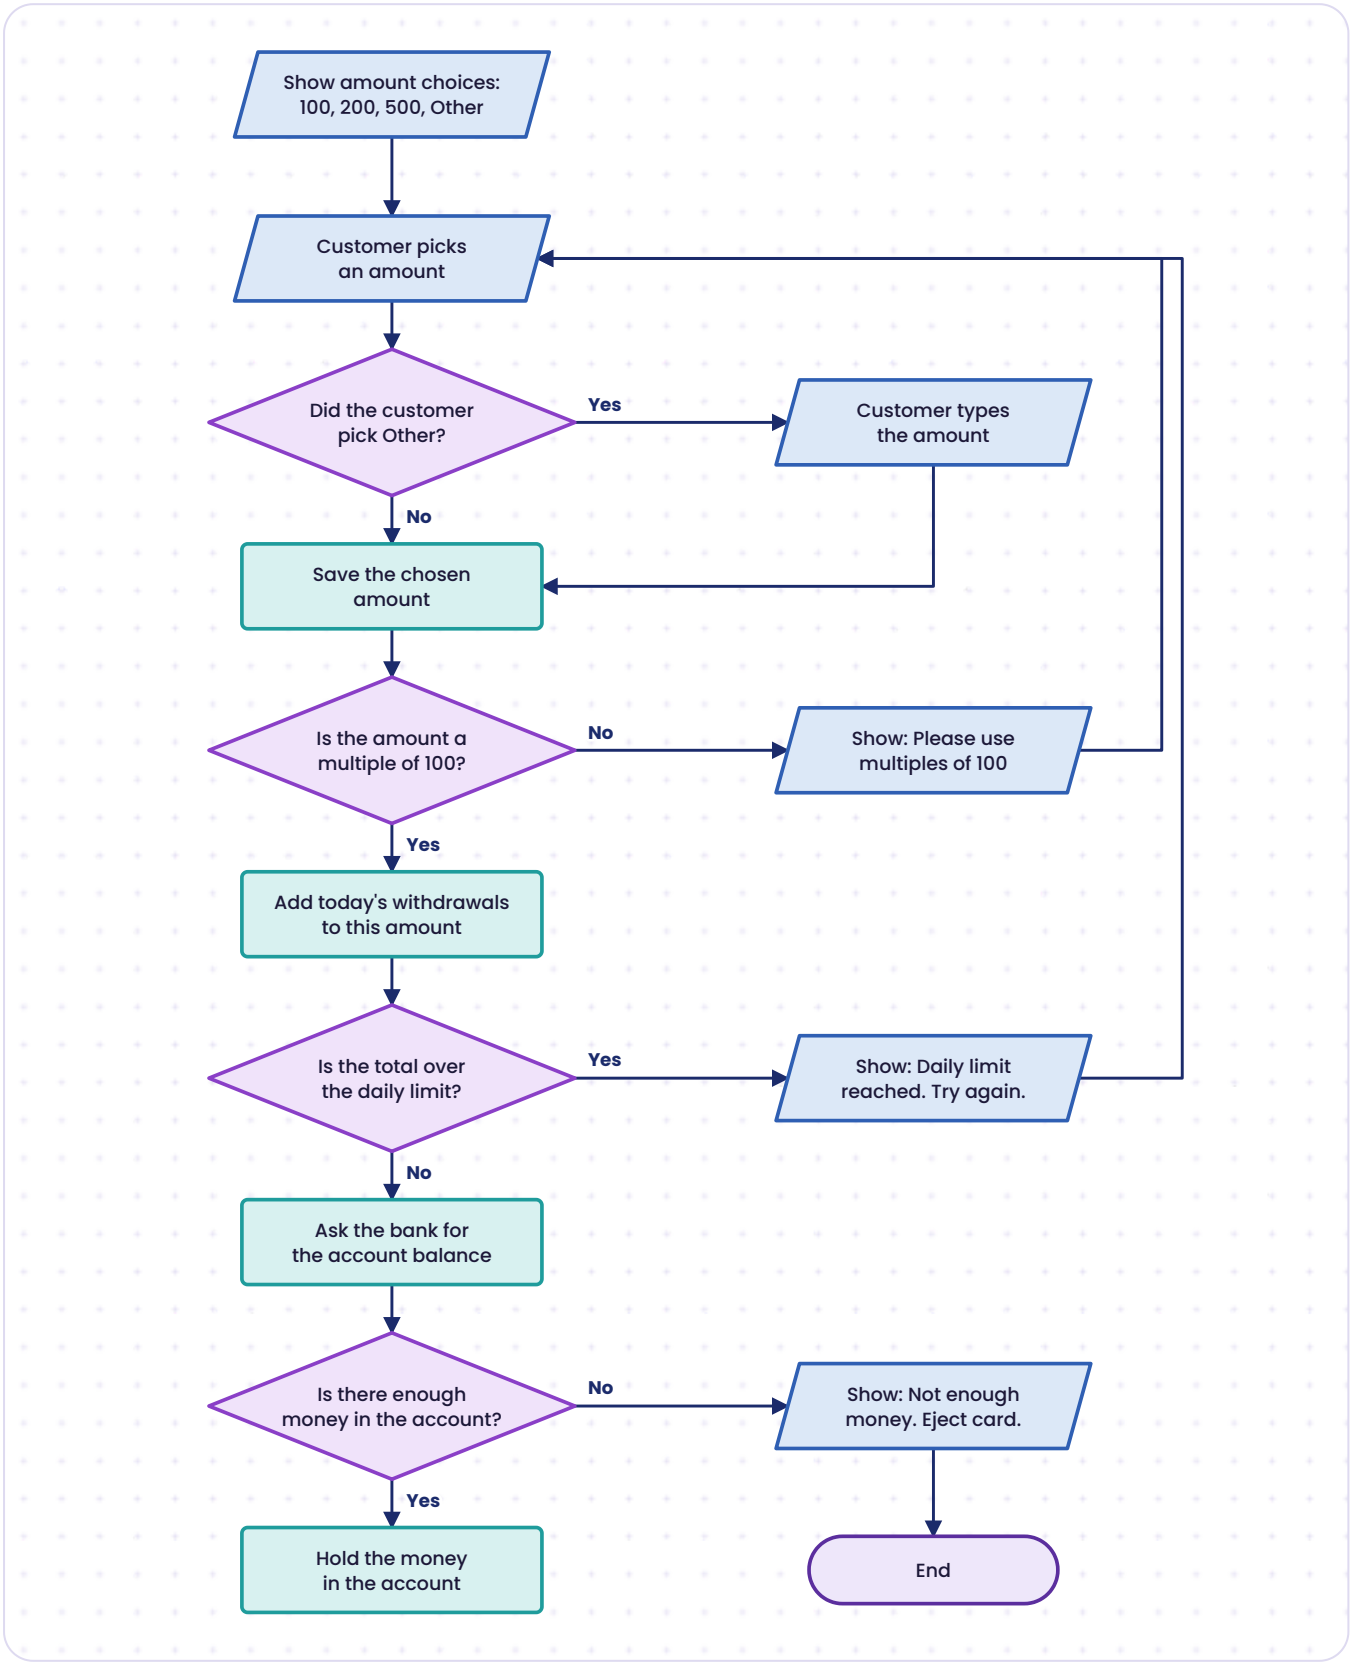

The customer types a PIN. After 3 wrong tries, the bank keeps the card.

PART 3 OF 6 · 15 STEPS

3 Choose the Amount

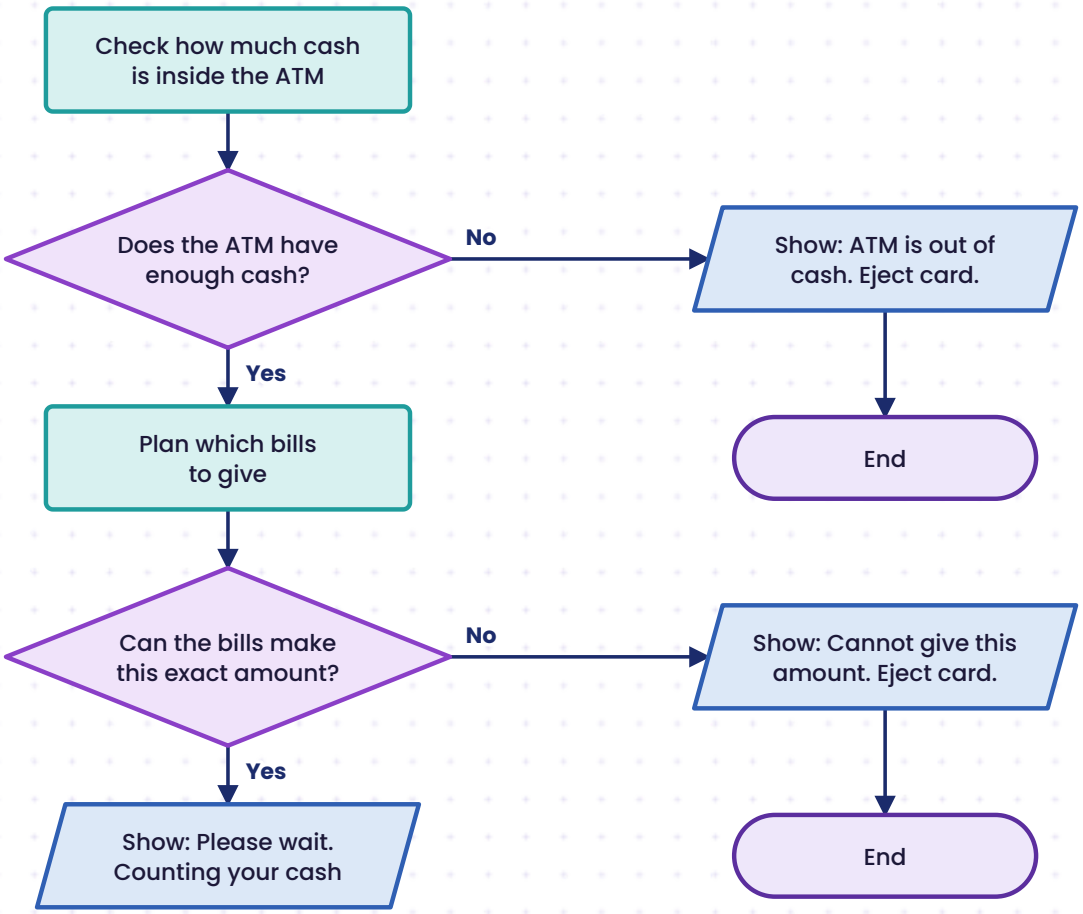

The customer picks how much money to take. The ATM checks the amount, the daily limit, and the account balance.

PART 4 OF 6 · 9 STEPS

4 Check the ATM

Before it gives any money, the ATM checks its own cash and its bills.

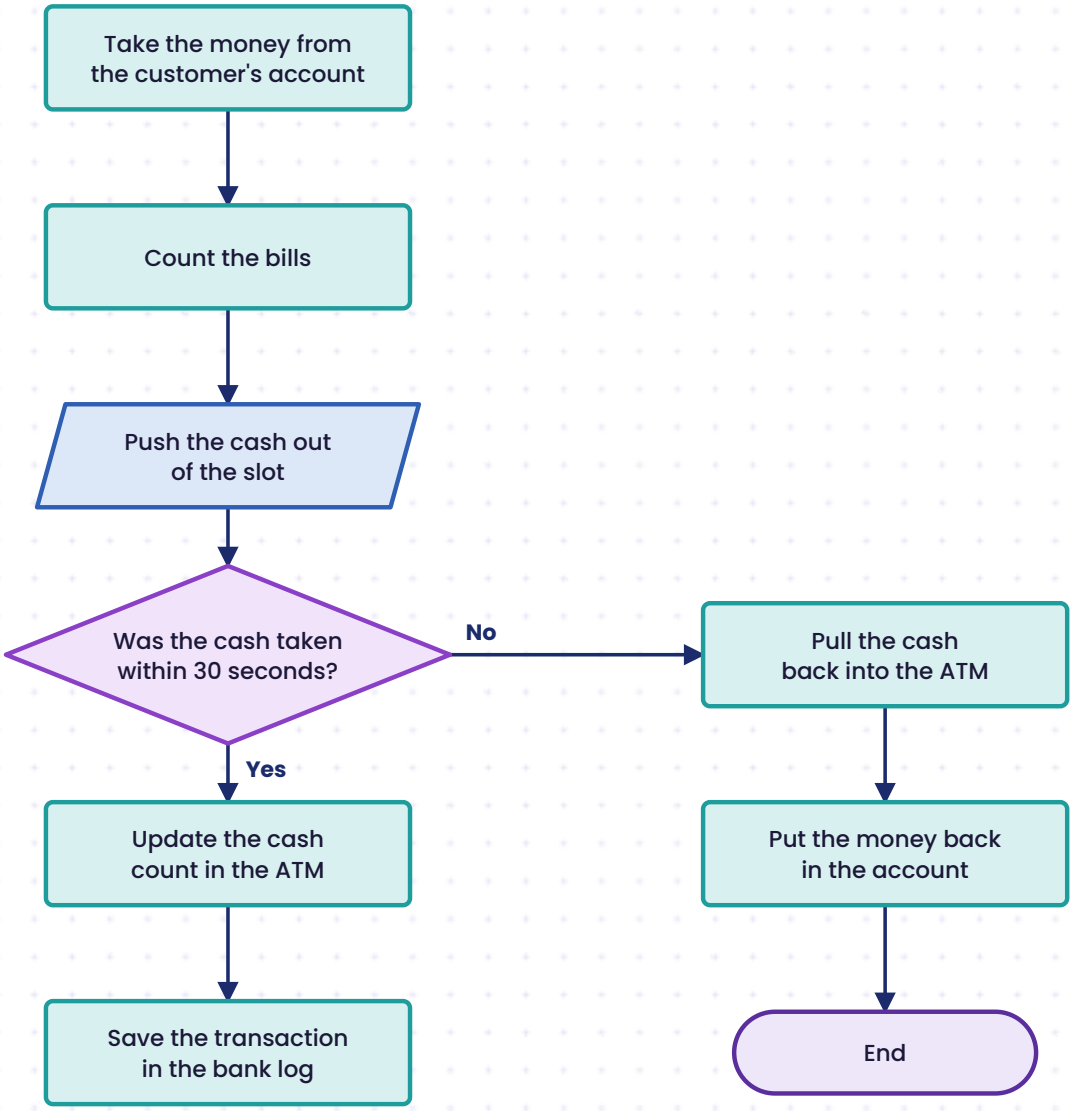

5

PART 5 OF 6 · 9 STEPS

Give the Cash

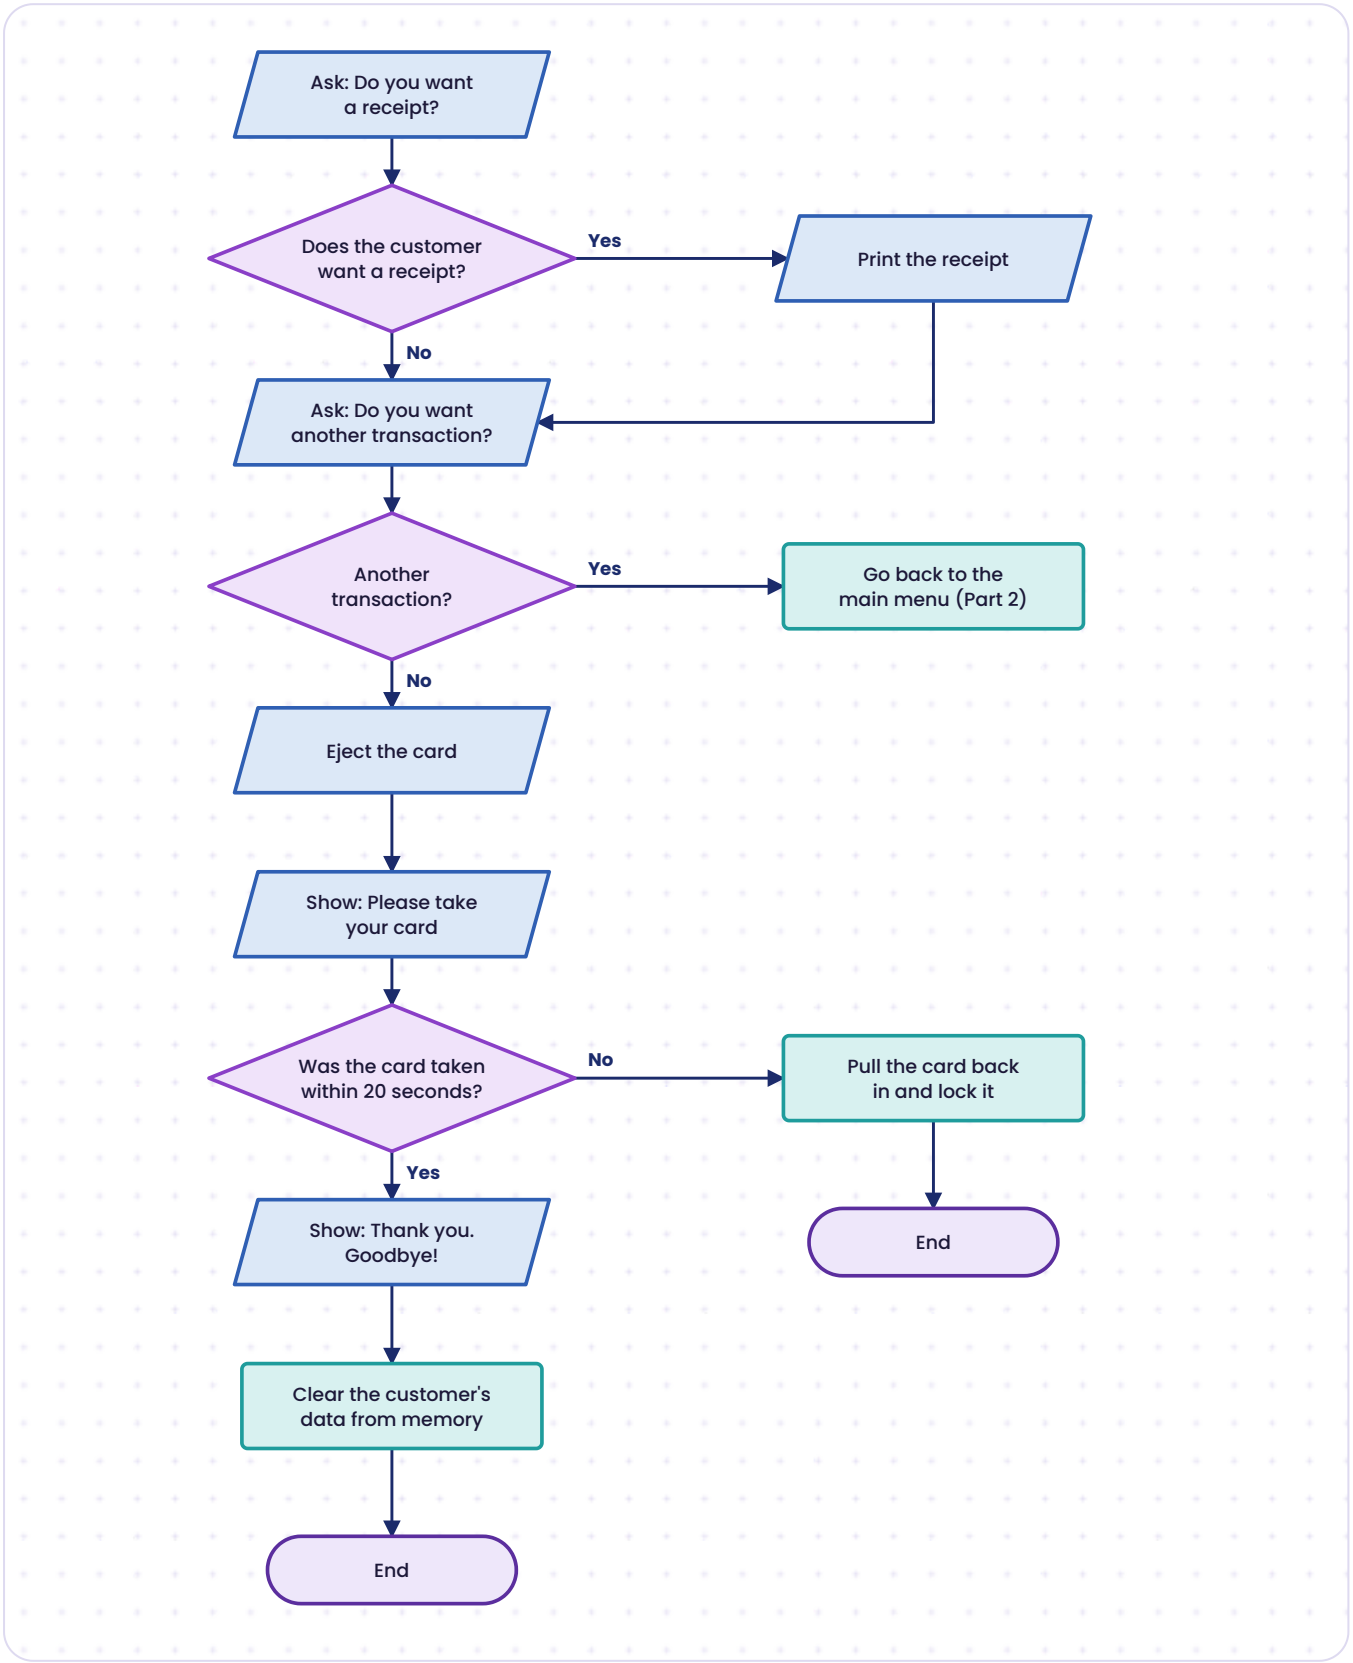

The ATM takes the money from the account and pushes the cash out. If nobody takes it, the money goes back.

PART 6 OF 6 · 14 STEPS

6 Finish the Transaction

The ATM offers a receipt, asks about another transaction, returns the card, and resets.

Numbers used in this chart

These are example numbers. A real bank sets its own limits.

RULE	VALUE	WHERE
PIN tries allowed	**3**	Part 2
Cash comes in steps of	**100**	Part 3
Daily limit check	**Today's total**	Part 3
Time to take the cash	**30 seconds**	Part 5
Time to take the card	**20 seconds**	Part 6
